Lab Exercise

[C-program Example]

Status Report 1

Please indicate if

- A. You have had trouble logging into MathLAN.
- B. You have logged into MathLAN, but had trouble opening a terminal window.
- C. You have successfully logged into MathLAN, opened a terminal window, and set the font size and color according to your preferences.
- D. What's a terminal window?

Status Report 2

Please indicate how far you have gotten on the Linux lab.

- A. Not yet started , or just
Opened a terminal window, copied and pasted material, and closed the window.
- B. B plus pasted the lines designated into ***your*** .bashrc file (working on your partner's account does not count) and/or modified emacs to inhibit the startup screen and to enable several highlighting options
- C. B plus added directories csc161, projects, labs, and sup-prob to ***your*** account.
- D. Copied a file called Makefile from my account to ***your account*** and/or copied this Makefile to your projects, labs, and sup-prob subdirectories
- E. Used the Linux cp command to copy a C program quarts-espeak.c to ***your*** account.

Linux Basics

While working on a lab (displayed in a browser), suppose you open a Terminal window. The line

`emacs quarts-espeak &`
appears in the browser.

You highlight the line, move the mouse to a terminal window, and then click middle mouse button. What happens.

- A. The mouse moves on the screen, the terminal window may be highlighted, but nothing much happens.
- B. The line
`emacs quarts-espeak &`
appears in the Terminal window
- C. B plus a new command prompt appears in the Terminal window.
- D. C plus an editing window appears for a file named `quarts-espeak`.
- E. The editing window appears, but not the new command prompt.

Terminal window processing

In a Terminal window, a user types

`emacs file.c`

What happens?

Options:

(1) An editor appears, allowing editing of `file.c`

(2) Processing waits in the Terminal window for `emacs` to finish.

A. neither (1) nor (2)

B. (1) but not (2)

C. (2) but not (1)

D. both (1) and (2)

What will happen when
you type
`history`
in a Terminal window

- A. The Terminal reports the timing of the last several updates to the computer.
- B. The Terminal reports the last 50 commands that were typed into the Terminal.
- C. The Terminal opens a window with references to the history of computing.
- D. An error is reported in Terminal.

What will happen when
you type
`man cat`
in a Terminal window

- A. The Terminal responds “tomcat”
- B. The Terminal provides information about the “cat” system command
- C. The Terminal prints the first page of Dr.Seuss’ children’s book, “The Cat in the Hat”.
- D. Why would you do that to a poor, innocent kitty?
