

Announcements

Thursday Extra tomorrow:

Titus Klinge: Software Engineering and Computational
Complexity of Molecular Programs

To be useful (and to get extra credit),
talk responses needed by Monday at 5:00pm

Command-line Arguments

Reminders for Extra Credit Supplemental Problems

- Submit using both email to grader and paper copy
- No more than 2 problems may be submitted Dec. 8-14 (time stamp on email used to determine submission before May 5)
- Work received after 5:00 pm CDT, Friday, Dec. 14, will not be read (time based on both email time stamp AND placement in my office—whichever is later)
- Signed academic honesty certification required
- Submissions must meet established academic/professional standards
 - opening comments for entire program,
 - appropriate structure with procedures/functions,
 - comments for every function with pre/post conditions,
 - proper formatting,
 - no global variables,
 - descriptive variables,
 - careful testing
- Code missing any essential element NOT GRADED
- Use insertion sort, if program requires sorting (if another sorting algorithm is desired, you must have my permission)

Command-line arguments

Note: Utilize parameters for main!

Questions

Clicker questions

What is printed by the following program (clicker1.c) run?

```
#include <stdio.h>
```

```
int
```

```
main(int argc, char* argv[])
```

```
{
```

```
    printf("%d",argc);
```

```
}
```

A. 0

B. 1

C. 2

D. Nothing

E. None of the
above

```
$ ./clicker1
```

What is printed by the following program (clicker2.c) run?

```
#include <stdio.h>
```

```
int
```

```
main(int argc, char* argv[])
```

```
{
```

```
    printf("%s", argv[argc-1]);
```

```
}
```

A. ./clicker2

B. c

C. def

D. Nothing

E. None of the
above

```
$ ./clicker2 a b c def
```

What is printed by the following program (clicker3.c) run?

```
#include <stdio.h>
#include <stdlib.h>
int
main(int argc, char* argv[])
{
    printf("%d",
        atoi(argv[1]));
}
```

```
$ ./clicker3 3.14159
```

- A. 0
- B. 3
- C. 3.14159
- D. Segfault
- E. None of the above

What is printed by the following program (clicker4.c) run?

```
#include <stdio.h>
```

```
int
```

```
main(int argc, char* argv[])
```

```
{
```

```
    printf("%s", argv[1]+1);
```

```
}
```

A. 0.14159

B. 2.7818

C. .14159

D. Segfault

E. None of the above

```
$ ./clicker4 3.14159 2.7818
```

```
$ echo -n hello, world
```

```
int main(int argc, char* argv[])
```
