

## Announcements

Thursday Extras: CS Commons on Thursdays @ 4:00 pm  
None next week (as far as I know)

## Quiz notes

- question 1 from in-class slides on Wednesday, Oct 2
- question 2a from Monday's lab, step 1
- question 2b from main loop of Robot Action Project

No quiz next week (Wednesday)

In-class test next Friday

## Binary integers

questions

discussion

Consider the following code segment:

```
int Max = 100;
char ch;
int i = 0;
char str [Max];
while (isspace(ch = getchar()));
while ((i < Max-1) &&!isspace (ch)) {
    str[i] = ch;
    i++;
    ch = getchar ();
}
str[i] = 0;
printf ("%s", str);
```

What is printed when the following is typed?  
this is a test

A. #thi#

B. #this#

C. #this #

D. #this is#

E. something else

Consider the following code segment

```
int a, b, c;  
printf ("enter a\n");  
scanf ("%d", &a);  
printf ("enter b and c\n");  
scanf ("%d %d", &b, &c);  
printf ("a: %d, b: %d, c: %d\n", a, b, c);
```

After the "enter a" prompt, the user types (on the same line)  
What appears on the screen, with user input?

- |                   |                   |
|-------------------|-------------------|
| A. compile error  | D. program waits  |
| B. run-time error | for more input    |
| C. enter a        | E. something else |

3 1 4

enter b and c

a: 3, b: 1, c: 4

Consider the following code segment

```
int a, b, c;  
printf ("enter a\n");  
scanf ("%d %d %d", &a, &b, &c);  
printf ("enter b and c\n");  
printf ("a: %d, b: %d, c: %d\n", a, b, c);
```

After the "enter a" prompt, the user types (on the same line)

3 1 4

What appears on the screen, with the user input?

- |                   |                   |
|-------------------|-------------------|
| A. compile error  | D. program waits  |
| B. run-time error | for more input    |
| C. enter a        | E. something else |
| 3 1 4             |                   |
| enter b and c     |                   |
| a: 3, b: 1, c: 4  |                   |

How is the decimal number 13 represented with eight binary digits or bits?

- A. 00001110
- B. 00001101
- C. 00000110
- D. 00000111
- E. None of the above.

What decimal number is represented by the binary number 00110011?

A.  $3 + 3 = 6$

B.  $32+16+2+1=51$

C. I need a calculator!

D. None of the above.

Which is the largest number that can be represented with 8 binary bits?

- A. 01111111 or 127 decimal
- B. 11111111 or 255 decimal
- C. I need more information
- D. None of the above.

00000110 is the binary representation for the decimal number +6.

Which of the following is

-6 in **sign magnitude** representation with eight bits?

A. 10000110

B. 11111110

C. 11111001

D. 11111010

E. None of the above.

00001101 is the binary representation of the decimal number 13.

Which of the following is

-13 in **sign magnitude** representation with eight bits?

A. 10001101

B. 11111101

C. 11110010

D. 11110011

E. None of the above.

00000110 is the binary representation for the decimal number +6, and 10000110 is the sign-magnitude representation for -6.

Which of the following is -6 in **one's complement** representation with four bits?

A. 10000110

B. 01111001

C. 11111001

D. 11111010

E. None of the above.

00000110 is the binary representation for the decimal number +6, and 10000110 is the sign-magnitude representation for -6.

Which of the following is -6 in two's complement representation with four bits?

- A. 01111001
- B. 11111001
- C. 01111010
- D. 11111010
- E. None of the above.
